Projects

Pinkology – Skincare E-commerce Website

Location

Date period

Created a responsive product-selling website using HTML, CSS, and JavaScript.

- Integrated interactive product sliders, category filters, customer reviews, and newsletter signup. Designed all UI components from scratch with attention to branding and user experience.

To-Do List Web App

Location

Date period

Tech Used: HTML, CSS (Bootstrap), PHP, MySQL

- Built a full-stack to-do list application with PHP and MySQL. Users can add, delete, and manage tasks through a web interface styled with Bootstrap. Tasks are stored in a MySQL database using server-side scripting (PHP), implementing complete CRUD operations.
